

MAKE YOUR DRIVEWAY OR PATIO **LAST LONGER** **REPAIR AND RESURFACE**

Take this opportunity to repair spalled cracked, or uneven concrete and give your driveway a longer life.

USE WOHL COATINGS CRYSTAL EPOXY SYSTEM

We do the Following:

- 1. Clean and Caulk all joints with Polyurethane Flexible Sealant. (Keeps water from under cutting the driveway).**
- 2. Repair all cracks and sunken slabs using our Shurbond 550 Epoxy Adhesive and our Shurbond 100 Polymer Concrete for a long lasting repair.**
- 3. Seal and repair all spalled areas to prevent further erosion.**
- 4. Apply our ShurBond Crystal 500 Epoxy Coating to entire surface. (Seals the repair area as well as the existing concrete while providing a uniform color to the surface).**
- 5. Apply WOHL Concrete Color Stain to finish the process and provide uniform, long lasting UV resistant WOHL Crystal Epoxy System.**

DOES YOUR DRIVEWAY LOOK LIKE THIS?

Spalled and botched repair.

OUR SYSTEM CAN MAKE IT LIKE THIS!

Sidewalk is a uniform surface and color.

Badly spalled light colored sections.

Spalled areas are repaired and protected from further spalling and entire driveway is uniform in color.

Our system will provide many trouble free years of service at much lower cost to the consumer than other epoxy systems.
